Summary

Look, I know that you are going to read over this resume and see that I don't have much work experience. As I am 100% self-taught and didn't have the chance to get my hand held through college where I would have gotten internships and the work experience needed to land a job easily. Coming into this industry with literally zero coding knowledge and getting to where I am today has been extremely difficult which is why I know for a fact that if I was to be thrown into any work environment I would be just fine with adapting and more importantly producing on the highest level possible. All I need is for you to give me a chance to prove it.

Experience

IMB Labs

Smart Contract Developer/Founder | 10/2021 - Present

I manage developers, help with smart contract creation, lead by example and this position requires me to stay up on the latest technologies and trends of this fast moving market. IMB Labs is an incubator of developers who build DAPPs and learn everything about the blockchain. We started off doing various NFT projects where we saw our first bit of success in this industry. Since then we have been working on building more sophisticated projects that will have greater impact on the space as a whole.

State Farm

Sales Representative/Customer Service | 01/2019 - 01/2022

Handled new business acquisition, serviced existing clients and learned about business management

Education

Udemy

Data Structures and Algorithms | 04/2022

Algorithms Mastered in this course: Searching Algorithms, Merge Sort, Bubble Sort, Selection Sort, Insertion Sort, Quick Sort and Radix Sort

Data-Structures: Hash Tables, Binary Heaps, Graphs, Binary Search Trees, both linked lists, Stacks + Queues

DAPP University

Solidity/Blockchain Development | 05/2022

This bootcamp was a thorough dive into Solidity, and everything needed to create a Decentralized Exchange like Infura, Truffle, and launching the UI through Heroku on the Kovan testnet

Scrimba

Full JavaScript Course | 06/2022

In this course I learned the fundamentals of JavaScript from the ground up. Some of the key points from this course include Async/Await JavaScript, DOM & State management, Higher Order Functions, data structures, and many more.

Scrimba

Front-end Developer Career Path | 06/2022

Packed with over 80+ hours of content I learned everything from the fundamentals of HTML and CSS as well as React, using APIs, Web architecture, Git and more

Skills

Solidity, JavaScript, Node.js, ReactJS, Infura, Truffle, Work Ethic, Discipline, Quick Learner
